INTRODUCTION: DECODING THE MOVIE INDUSTRY

PRESENTATION OBJECTIVE

“A data-driven exploration of the key factors behind success in the film industry, based on analysis of a dataset of over 43,000 movies.”

WHAT WE WILL EXPLORE

How genre, runtime, and market trends shape a movie’s success — and which factors matter most for revenue and popularity.

FILMS RELEASED BY DECADE

< 4,000

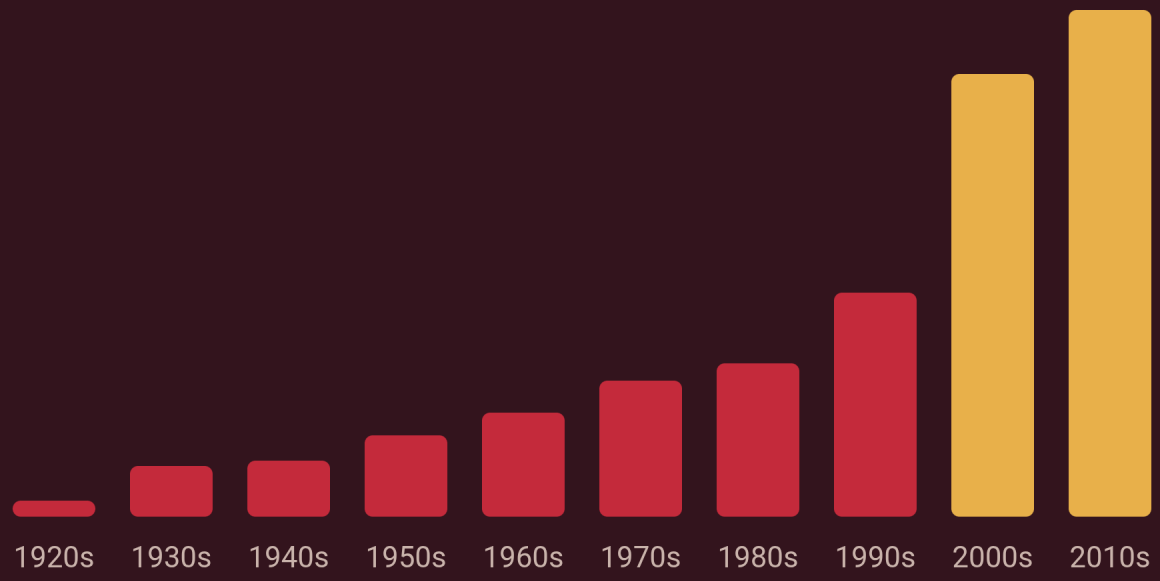

Output stayed under 4,000 films per decade until the 1990s.

3X

The 2000s and 2010s each produced roughly 3x more films than the 1990s.

Growth reflects cheaper digital production and a wider range of countries producing film.
